Quality Policy

For Eastern Aircon quality is a conformance to customer needs and expectations on time. As a specialized service company, quality is preparation and execution of the job as per customer's unique requirements and their satisfaction.

By constantly improving our process, we increase our competitiveness to get ahead of competition. This strengthens teamwork and problem solving acumen, it also helps being pro-active in our approach to delivering service right, all the time

The principles set to achieve our quality standards are below

- Customer satisfaction.
- Motivation and team work.
- Continuous improvement, check and recheck for best option.
- Analyze and evaluate the best solution for the client giving priority to client's needs, cost effectiveness and trying to minimize risk and hazard to personnel.

Our biggest priority is to maintain co-ordeal client relationship by providing the most efficient service and by minimizing equipment breakdowns.

Safety Policy

This policy represents the commitment to safety management and applies to all business units controlled by **Eastern Aircon**. The main part of our work is performed on large scale industrial plants where accidents may have very serious consequences.

Therefore, health, safety and environment are extremely important factor for us in the execution of our work, quality management and health safety and environment (HSE) are also integral elements in our everyday work and in our products and services.

The safety program also contents to educate and train employees in current safety issues and practices as well as provide employees with feedback on their individual performances. Through this program employees will also receive instruction on record keeping requirements in accordance with recognized standards.

REPLACEMENT, MODIFICATIONS & UPGRADING
OF THE AIR CONDITIONING AND REFRIGERATION SYSTEMS

We supply and install the proper new equipment required to replace discarded units and related accessories and electrical works involved. The huge replacement ranges from the simple small unitary unit to a large capacity machine with its complex electrical panels and direct digital control system.

Eastern Aircon also undertakes many assignments in modification & upgrading of existing air conditioning systems. The purpose of such undertakings is usually to enhance the system performance, reliability and to prolong its utilization. During these years we have completed many projects in jubail. These projects involve, partial and total replacement and relocation of chiller, modification and expansion of chilled water piping network. Air distributions improve the air filtration system with today's latest technique and accessories and introduce special controls to enhance the operation and save power consumption etc.

QUALITY PLAN

TABLE OF CONTENTS

- QUALITY POLICY AND OBJECTIVE
- PROJECT QUALITY MANAGEMENT OVERVIEW
- MATERIAL CONTROL & MATERIAL PRESERVATION PROCEDURE
- CONTROL OF NON-CONFORMANCE AND CORRECTIVE ACTION

1. QUALITY POLICY AND OBJECTIVE

Eastern Aircon quality policy is to achieve sustained, profitable growth by providing services which consistently satisfy the needs and expectations of its clients.

This level of quality is achieved through adoption of a system of procedures that reflect the competence of the Company to existing clients, potential clients, and independent companies.

Achievement of this policy involves all staff, who is individually responsible for the quality of their work, resulting in a continually improving working environment for all. This policy is provided and explained to each employee by the Quality Manager or Quality Engineer.

To achieve and maintain the required level of assurance the Quality Engineer retains responsibility for the Quality System with routine operation controlled by the Quality Engineer.

The objectives of the Quality Assurance System are:

a) To maintain an effective Quality Assurance System complying with International Standard (Quality System).

b) To achieve and maintain a level of quality which enhances the Company's reputation with clients.

c)To ensure compliance with relevant statutory and safety requirements. To endeavor, at all times, to maximize client’s satisfaction with the services provided by Eastern Aircon.

PM Moncy

Manager –Operations

2. PROJECT QUALITY MANAGEMENT OVERVIEW

1. PURPOSE

2. OBJECTIVES

3. DEFINITION

4. RESPONSIBILITIES

5. TECHNICAL ASSURANCE PLAN

6. EQUIPMENT FAT

7. JOBSITE WORK

PURPOSE

d. Carry out all inspections and tests in accordance with CLIENT specifications, Standards and CLIENT approved ITP, PQP
e. Responsible for maintaining all QC log sheets and documents for Instrumentation

TECHNICAL ASSURANCE PLAN

EQUIPTMENT FAT (IF ANY)

Factory Acceptance Test

The Eastern Aircon shall arrange for the FAT. All the equipment's under the project shall be inspected as per client's requirements or project specifications.

Nonconformance

If the equipment reveals some weaknesses, a report shall be prepared and sent to the manufacturer for corrective actions

3.MATERIAL CONTROL AND MATERIAL PRESERVATION PROCEDURE

SCOPE

This procedure describes the Material approval, procurement, receiving inspections and preservation Procedure.

RESPONSIBILITY

QA/QC Engineer, Project Manager, Project engineer.

PROCEDURE

•Prior to material procurement the Material specs shall be verified with the design document.
•The material catalogue or MTC shall be produced to CLIENT – & CLIENT – QA/QC for review and approval for specs and vendor approval
•On the completion of material procurement, the same shall be subjected to CLIENT- QA/QC Material receiving inspection before construction
•During inspection all related documents along with MAR shall be produced.
•All inspection reports and other documents relating material shall be produced in the QC dossier
•Efficient stock record system shall be maintained by Eastern Aircon.
•Preservation of the project material in case of delay due to maintenance or other issues is to be done and shall be done as below
o Material is to be kept closed from dust & water by proper boxing and covering

o Material documents to be handed over to the concerned CLIENT-Site Team
o Material is to be tagged in the Project name
o Material shall be delivered to either CLIENT – Warehouse / Lay down area in Plant

4. CONTROL OF NON-CONFORMANCE AND CORRECTIVE ACTION

SCOPE

This chapter applies to the control of non-conforming items of vendor and site to be identified, documented, notified, evaluated, segregate (when practical) and disposition.

DEFINITION

Use as is

Where the disposition of a noncompliance is to “use as is”, the Engineer shall raise a deviation request.

Repair - In case the non-conforming product are accepted with repair by concession.

Reject - Not to use non-conforming products by removing it and replace it.

Responsibility and Authority -Any person who is aware of nonconforming condition is responsible for identifying and documenting condition.

The site quality personnel are responsible for ensuring the condition of site is correctly identified, validated, tagged, segregated, disposition implementation verified and maintenance of nonconforming reports log.

NON-CONFORMANCE

This section defines the requirements for controlling materials, parts, or components that do not conform to specified requirements. The intent is to ensure that non-conforming items are identified, documented, segregated, and disposition to prevent in advertent use or installation. When appropriate, a proactive corrective action may be required to prevent recurrence of the non-conformance.

CORRECTIVE ACTION This section defines the approach used on the Program to identify opportunities for continuous improvement, and identify appropriate corrective actions that address the root causes of non-conformances or process problems, monitor and document their implementation, and review their effectiveness.

RESPONSIBILITY - Project Team

PROCEDURE

NON-CONFORMANCE- All Program and project personnel detecting non-conformances shall identify the non- conformance to the lowest-level quality personnel appropriate as
quickly as practical. Non-conformances will be documented by Eastern Aircon, resident engineers, inspectors or the Program QA personnel on an approved non-conformance report (NCR) form.

The Program QA personnel will monitor Eastern Aircon and supplier quality control procedures for controlling and processing NCRs, and ensuring that they contain the correct information.

CORRECTIVE ACTION

Project quality representatives shall document and implement corrective actions resulting from NCRs, inspections, etc.

The Program QA personnel shall lead a review of corrective actions and verify that their implementation is effective at correcting the process deficiency identified in the NCR. Verification may also be performed by contractors, suppliers, and design consultants.

SAFTEY PROCEDURE

1. All the working employees shall be well safety oriented and trained to use Personal Protective Equipment's, for head, eye, face, hand, and feet protection. Respiratory protective equipment, safety belts, and life line shall use as per the site requirement.
